

This small and lightweight BUC is ideal for mobile and satellite uplink applications. Designed to be mounted on the feed horn, the BUC has excellent efficiency and consumes less than 250W for 50W C-Band BUC. The unit works on a wide range DC power supply of 38V to 60V. The BUC is able to work up to 60°C. Innovative and efficient thermal design makes this BUC one of the smallest, lightest and most reliable in the industry.

With redundancy-ready feature, the unit can be easily configured to work in 1:1 redundant mode.

Features

- · Compact and lightweight
- Feed mountable
- Wide operating temperature range -40°C to +60°C
- Wide input DC Voltage range 38V to 60V
- Standard remote monitor & control through RS485, optional Ethernet (SNMP & HTTP)
- Excellent linearity
- Extremely reliable
- High power efficiency
- Available for all C-Band frequency ranges
- Excellent phase noise characteristics
- Low spurious
- · Forward power detection facility
- · Automatic fault identification & alarm generation
- Automatic temperature compensation feature
- Redundancy ready
- RoHS compliant
- · Waterproof with IP65 standard
- · LED indicator for BUC status

Quality Assurance

100% of all BUCs go through stringent quality checks in addition to well defined Electrical Stress Screening to ensure operation in harsh outdoor environments. The BUCs are also subjected to seal test for water ingress verification.

Reliability

Field proven under harsh environment conditions, Agilis ODUs can withstand temperature ranging from -40°C to +60°C with up to 100% humidity.

Frequency Band

INTELSAT

Tx : 5.850 to 6.425GHz IF : 950 to 1525MHz LO : 7375 MHz/4900MHZ

INSAT

Tx : 6.725 to 7.025GHz IF : 1100 to 1400MHz LO : 8125MHz / 5625MHz

PALAPA / ST1
