

TPRO 120 - 1.2m Rx Only Ku Band Flyaway

The TPRO120 Military Communications (MILCOM) antenna system from Holkirk is renowned for its compact size, light weight and powerful performance which has been designed to excel in today's increasingly demanding satellite receive market place.

The TPRO120 as standard is supplied with a universal LNB to allow full Ku-Band operation with tone switching for H / V polarisation.

Revolutionary

The main reflector is manufactured from high quality carbon fibre and is supplied in six easily assembled petals that employ a revolutionary spherical dowel locking mechanism to ensure perfect alignment.

Options:

Single output

Dual output
