

QD-98 AVANTI

Remotely Deployable Terminal

- 98cm Quick deploy terminal
- Strong, light weight tripod
- Simple installation
- Antenna pointing app for smart phone
- Ruggedised transport cases

The QD-98 and QD-98 Precision are the latest in the Holkirk Ka Band satellite terminal family and have been designed to access the pan-european, Eutelsat Ka-Sat network.

For either stand-alone remote internet access or as part of a bonded 3G/4G system, the QD-98 is a fast, accurate and re-deployable system that will provide up to 10Mbits/sec upload speeds with guaranteed confirmed information rates.

To make satellite access as simple as possible there is an online booking system that will allow you to pre-book air-time and an easy to use smart phone app to assist in pointing the antenna manually.
