

MFC

Microwave Filter Company, Inc.

Creating Filters and Components to 50 Ghz for Over 50 Years!

5G - Mitigation

5G , The MFC Solution

5G is in the forefront of Technology news today and promises consumers increased mobility, con-

nectivity, and data speeds. With the planned expansion of 5G around the world, the potential for interference to existing communication systems will require an RF Filter to suppress unwanted signals. Mid Band 5G falls within the frequency spectrum of the existing Global C-band Satellite receive band where the much stronger 5G signal may potentially overload the front-end of the Satellite receive equipment.

Microwave Filter Company has produced RF Filters that prevent C-Band interference for more than 40 years. We've already designed custom C-Band Filter solutions used to suppress 5G interference for systems that are currently deployed. We're ready to assist in finding a Filter solution to meet your needs.

MFC

Microwave Filter Company, Inc.

Creating Filters and Components to 50 Ghz for Over 50 Years!

5G - Mitigation

Where to begin....

The MFC ordering process is *streamlined*, efficient and easy for customers to navigate.

- Contact us by web
- Contact us by phone, talk with a live person
- Discuss your filter needs
- Tell us what portion of the C-Band you need to preserve

MFC Technical Advisors will be happy to assist and will work with you to ensure a robust solution to your interference issues.

MFC is a global solution provider and can develop and manufacture C-Band interference filters for any system in the world.

MFC

Microwave Filter Company, Inc.

Creating Filters and Components to 50 Ghz for Over 50 Years!

5G - Mitigation

MFC Value....

Microwave Filter Company has decades of experience with filters for RF interference. Our C-Band interference filters are accurate, repeatable and reliable. As 5G networks will be installed world-wide, it is important that C-Band systems have the appropriate filtering installed to prevent 5G interference or system downtime.

What makes MFC different

- Consultation
- Rapid prototyping
- Product development
- Manufacturing

Our inventory houses many previously developed C-Band interference solutions that can be rapidly shipped and are attractively priced.
