## 1831 Agilis

## 1.8 Meter Motorized Carbon Fiber Flyaway Antenna

- Intelsat & Eutelsat Compliant (using Appropriate Feed)
- Multi-Band C, X, Ku, DBS and Ka Band Frequencies
- Integrated Feedboom Assembly Option
- Ships in 4 Ruggedized All-Weather Cases
- · Superior Stability in Wind
- Excellent Reliability
- Minimal Maintenance
- · Less than 15 min Assembly Time
- 3-Axis Motorization with full featured control system
- Autolocate features with GPS, Compass, DVB-S2 Receiver, Beacon Receiver, and Spectrum Analyzer Options.

The Sat-Lite Technologies Model 1831 Agilis motorized carbon fiber flyaway antenna offers superior performance in a lightweight, portable package. This antenna features a 7 piece carbon fiber segmented reflector designed to provide high gain and low cross pol characteristics. The motorization package includes a ruggedized outdoor mounted controller with pre-connectorized cables allowing for quick assembly and disassembly. The custom-designed elevation-over-azimuth tripod pedestal provides high stiffness with minimal weight. The antenna components are modular in design which also reduces assembly time and provides an improved packaging scheme requiring less time and effort to pack or unpack the antenna. The molded cases are included.

The antenna is designed to meet international performance specifications for commercial or off-the-shelf military applications and is readily available in C, X, Ku and Ka band frequencies. Multiple feed and integration configurations are available.
