## 2411-HW PELORIS

## 2.4 Meter Motorized High Wind Vehicle-Mount Antenna

3 Piece Reflector Option - Stowed

The Sat-Lite Technologies Model 2411-HW vehicle-mount antenna is strategically designed to offer high wind performance in a compact design. This antenna features a carbon fiber composite reflector and backbeam structure along with a custom-designed compact elevation-over-azimuth cable drive pedestal to reduce vehicle mounting space. The mechanical design features of this antenna offer exceptional performance even using lower cost open loop control systems.

The antenna is designed to meet international performance specifications for commercial or military applications and is available in C, X, Ku and/or Ka band frequencies. The antenna is offered with multiple controller configurations that include manual jog control, autolocate with peaking options, GPS / Dual GPS, compass, and full tracking capabilities using beacon receiver for modulated beacons.

- High Wind Applications
- Intelsat / Eutelsat Compliant
- Multi-Band C, X, Ku or Ka band Frequencies
- Multiple Integration Options
- Integrated Controller with Tracking Options Available
- Carbon Fiber Reinforced Polymer Structure – Reflector and Backbeam
- Low Profile and Space-Optimizing Stow Position
- Cable Drive Positioning System for Azimuth and Elevation
- Single or 3 Piece Reflector Option
- Harsh Evironmental Options
